Vaccine Information

Vaccine Safety

On Thursday (4/8) media outlets reported that Wake County's PNC Vaccine Clinic suspended administration of the Johnson & Johnson (J&J) vaccine after several recipients were reported to have had adverse reactions such as nausea, dizziness, fainting and one allergic reaction. These instances have been investigated by local health officials as well as CDC representatives. Their investigation determined 2,300 people received the J&J vaccine yesterday. Of those, 18 people were found to have experienced adverse reactions, meaning that 0.78% of vaccine recipients had a reaction.

WRAL News spoke with Dr. David Wohl, an infectious disease specialist at UNC Health about these instances. Dr. Wohl was reported to have made the following statements.

"Over the next couple of days, health experts will study safety reports, look at every reaction and look at ways to calm those who are nervous around the shot."

"I don't think this is an allergic reaction. Most of the people that I've seen here today who have felt faint have a history of feeling faint, especially around needles. So, it's really hard," explained Wohl. "We're also vaccinating different people than we did before. Often times, people take the Johnson & Johnson vaccine because they are adverse to needles and they don't want to take a shot. We're just trying to make sure if it's the vaccine or the people taking the vaccine or a combination of both."

Health experts from the CDC did not find any safety issues or reasons for concern and have recommended that vaccination efforts continue.

The complete WRAL article can be viewed using the following link.

<https://www.wral.com/covid-19-vaccine-clinics-put-j-j-vaccine-on-hold-after-adverse-reactions-cdc-finds-no-safety-issue-with-vaccine/19616960/>

Beaufort County providers, who have primarily given Moderna and J&J vaccines, have reported observing very few reactions at the time of vaccine administration. Of these few cases, the most common symptom has been described as “light headedness” or “felling faint”, primarily by individuals who do not like needles and / or receiving shots. There has also only been 1 reported allergic reaction, which resulted in a rash at the injection site.

The most common side effect reported from recipients of these vaccines has been fever / chills and a general “tired” feeling. These symptoms typically develop 4 to 8 hours after receiving the vaccine, and last for 12 to 24 hours. These symptoms also appear to be more common with individuals below the age of 65. While these symptoms can be an inconvenience, they are less severe and much shorter in duration than the symptoms caused by COVID-19 infections.

Please refer to the following links for safety information, side effects and effectiveness of each of the currently available COVID-19 vaccines.

Vaccine Eligibility

NCDHHS has announced that individuals age 16 and up are now eligible to receive the vaccine. However, Pfizer is currently the only vaccine approved for this age group. Most of Beaufort County’s Providers have Moderna and Johnson & Johnson, both of which are only approved for individuals 18 years of age and older.

Pfizer vaccines are available at participating Walgreen Pharmacies as well as Vidant's Greenville Vaccine Clinic. (Please see above the contact information for these locations.)

Beaufort County's Vaccine Efforts

As of Thursday (4/8), approximately 28,879 total doses of the COVID-19 vaccine have been administered to Beaufort County residents. 16,143 of our county's residents have received their first dose and 12,736 residents have completed the two shot series.

Beaufort County providers remain committed in our efforts to vaccinate all those who are interested in the COVID-19 vaccine as quickly and efficiently as possible. Please continue to monitor www.bchd.net for updated information regarding the COVID-19 vaccine, as well as the transitions as we move through the various phases of vaccination.

Transportation Assistance to Vaccine Appointments

Beaufort County remains committed to the goal of providing vaccinations to all eligible citizens as quickly as possible. If you have an appointment to receive the vaccine, and are unable to secure transportation to the vaccine site on your own, please call Beaufort Area Transit System (BATS) for assistance at [252-946-5778](tel:252-946-5778).

NC Community Spread Map (Updated: 3/27)

North Carolina health officials are utilizing a county alert system to pinpoint counties with the highest levels of COVID-19 spread. This new map uses metrics informed by the White House Coronavirus Task Force and North Carolina's key metrics to categorize counties into three tiers

1. Green: Low Community Spread
2. Light Yellow: Moderate Community Spread
3. Yellow: Significant Community Spread
4. Orange: Substantial Community Spread
5. Red: Critical Community Spread

This map of North Carolina below shows which counties are in what tiers.

NC Counties by Tier: Data from March 14 through March 27, 2021

Resources

We have created a resource page that can accessed at:

<https://co.beaufort.nc.us/departments/human-services/public-health/2019-coronavirus-covid-19>.

This resource page contains guidance for businesses, long term care facilities, families, and more.

We are here to offer support and answer any questions or concerns. We are encouraging all community partners to share accurate information and promote it within your businesses, communities, and elsewhere. Beaufort County's website and Facebook page are great ways to stay up to date on accurate information.

Thank you,
